

**The Kemptville Health and Social Services Complex is Expanding.  
PARTNERS AND TENANTS WANTED.**

As part of our ongoing mission to Build Healthier Communities the Kemptville Hospital is expanding its health and social services mall. This is an invitation to health and social service providers in either the public or private sector to join the growing number of services located at this service hub. The to be developed space will included direct client service areas, administrative space as well as the potential for shared common areas.

The Kemptville area is among the fastest growing set of communities in Eastern Ontario. The Kemptville Health and Social Services Complex, including the newly redeveloped Kemptville Hospital is the service hub for these communities.

For additional information or to express your interest in being part of the phase two development please contact:
